## Fresno Firm Bids Wishiah Hospital

WASHINGTON, D. C., May 11.—Trewitt-Shields & Fisher, Fresno, at \$63,650, today submitted low bid to the Department of the Interior for construction of a hospital and accessory buildings at Wishiah Sanitarium, Sacramento Agency, Midstate Construction Co. Fresno, was second low bidder for the contract, with a proposal of \$66,420.

## GRIFFITH LOW ON VENTURA GRADING

LOS ANGELES, May 13.—Griffith So., 502 Los Angeles Railway building, Los Angeles today submitted a low bid of \$3,651 to the State Division of Highways here for grading and surfacing with asphalt concrete and plant-mixed surfacing about two and two-tenths miles in Ventura county, between Pyle road and Telegraph road.

Second and third low bidders, respectively, for the contract were Dimmitt & Taylor, Los Angeles, at \$91,372; and United Concrete Pipe Corp., Los Angeles, at \$92,684.

## BIDS SCHEDULED ON ALTERATIONS AT STATE FARM

Proposals June 8 for Kitchen  
Changes, Boiler Plant  
At Stockton

SACRAMENTO, May 11.—Contributing to the rush of contracts placed on the market today by California state agencies, the State Division of Architecture invited bids for additions and alterations to the state hospital farm at Stockton.

Proposals on the contract will be opened in Sacramento June 8, State Architect George B. McDougal announced.

### Boiler Plant

Work includes additions and alterations to the kitchen building, a reinforced concrete structure with wood framed roof; and construction of a new reinforced concrete boiler plant building with steel sash and tile roofs, to be constructed around the existing boiler equipment.

Segregated bids will be taken on three contracts: for general work, for electrical work, and for plumbing and heating.

## ASK PROPOSALS ON INTERURBAN DEPOT IN S. F.

Structure at First and Mission  
Will Provide Access to  
East Bay Trains

SACRAMENTO, May 11.—Bids for construction of the San Francisco terminal for the interurban rail system to operate over the San Francisco-Oakland Bay Bridge will be opened June 16, Chief Engineer C. H. Purcell announced here today.

The proposal sheet will include an extensive bidding schedule of 84 items.

The structure will be three stories in height, of reinforced concrete construction, with granite facing on the headhouse and steel roof framing over the track level on the top floor. It will have reinforced concrete floors, and roofing will be composition over concrete. The building itself will be 165 feet wide by 700 feet long.

### Ramps, Stairways

Located at First and Mission streets, the building will house an intricate system of ramps and stairways by means of which passengers will have access to and from high-speed electrically operated trains which will arrive and depart on elevated tracks.

Two alternate plans are proposed in the bidding schedule. Plan One involves construction of extensive garages in the west end of the building, while plan two calls for construction of the terminal omitting the garages.

Bids will be taken for general work only; for structural steel work only; for mechanical work only; for electrical work only; for general construction and structural steel work; and for general construction, structural steel, mechanical and electrical work.

### Platforms Roofed

All tracks and loading platforms in the terminal will be entirely roofed for the 700-foot length of the structure, with lighting provided by large skylights and windows.

## BIDS ON FIVE ADDITIONAL STATE HIGHWAY CONTRACTS OPEN IN JUNE

SACRAMENTO, May 18.—Continuing the rush of state highway projects to be placed under construction with the opening of the new fiscal year, the State Highway Commission invited bids on five contracts, scheduling four Northern and Central California jobs for opening June 9 and one Southern California project for the following day.

Bids will be opened in Sacramento June 9 on projects located by counties as follows:

**DEL NORTE:** construction of a reinforced concrete bridge across Myrtle Creek, about ten miles north of Crescent City. The bridge will consist of eighteen 15-ft. slab spans on an open spandrel arch and concrete bents and abutments.

**Shasta Grading**  
SHASTA: about seven-tenths of a mile of grading and surfacing with crusher run base and road-mix surfacing at China Gulch.

**PLUMAS:** road - mix surfacing and seal coat application on about 16.1 miles between Feather River Inn and Beckworth.

**MADERA:** installing under-drains on about eight miles between Keshaw Corners and Coarse Gold.

On June 10 bids will be opened by the State Highway Engineer in Los Angeles for applying road-mix surface treatment to shoulders on about 33.9 miles at various locations in Los Angeles and Orange counties.

## ASK HOLLISTER HOSPITAL BIDS

Bids for construction of the \$60,000 San Benito county hospital will close July 1, Architect Robert Stanton of Del Monte announced yesterday. The structure will be a one-story reinforced concrete building. It will contain 16 two-bed rooms for elderly indigents, two regular hospital rooms for patients, operating and X-ray rooms, kitchen and dining room, laboratory, recreation room, delivery room, and infants' room.

Architect Stanton reported that working drawings for the \$110,000 King City high school auditorium probably will be completed within a month.

## BIDS JUNE 3 ON MAD RIVER PIPE PROJECT

### Council Approves the Revised Plans for Second Section of Supply System

Following approval by the Eureka city council of revised plans for the pipe line section of the Mad River water supply project, the contract was authorized for advertising. Bids will be opened by the council June 3, City Clerk A. Walter Kidale announced.

The 23-mile pipe line will extend, when completed, from the site of the dam now being constructed on Mad River by T. E. Connolly and Hanrahan Corp. to the existing distributing tanks at Harris and E streets in Eureka.

Originally advertised as a unit, the project was divided and the dam contract awarded separately when it became apparent that available funds would not cover the entire cost. Eureka voters recently approved a bond proposal to complete financing of the pipe line section, and revised plans were approved by PWA.

### Types Will Vary

Types of construction, according to Engineer C. C. Kennedy of San Francisco, who prepared the plans, vary according to topography of land which the line will cross.

About ten miles of the line, at the upper end, will be of concrete and lined steel pipe, 30-inches in diameter. Scattered sections will be of 36-inch redwood stave pipe.

At the city end of the line, approximately ten miles will be constructed of 24-inch lined steel pipe, while the contract also calls for construction of 1245 feet of 18-in. lined steel pipe within the city limits. The latter section actually is a portion of the distribution system within the city.

Shipments of fire motor apparatus for the first three months of 1937 totalled 193 units, as compared with 132 units for a similar period in 1936, and 88 units for the first three months of 1935, the Bureau of Census reports.

## A.G.C. ENTERS DRIVE FOR PWA CONTINUATION

### Northern Calif. Chapter Proposes Allotment of At Least \$350,000,000

Seeking to insure continuance of PWA, at least for an additional two years, the Northern California Chapter, Associated General Contractors, has written members of the house appropriations committee outlining reasons why the Public Works Administration should not be allowed to become dormant and urging a definite allotment to PWA of not less than \$350,000,000.

Recommendations of the chapter, as outlined by Secretary-Manager Floyd O. Booe, are:

1. A continuance of the PWA facilities for an additional period of at least two years after its expiration date of June 30, 1937;

#### Definite Allotment

2. Specific mention should also be incorporated in this appropriation measure to earmark or allocate a sum of at least \$350,000,000 to be expended entirely on a basis of competitive bidding under the auspices of the PWA;

3. In order to prevent the inclusion of additional clients on the relief rolls by the cessation of the PWA, methods should be adopted to prevent this occurrence, instead of trying to render relief after the workers have been forced to this extreme.

4. Grants on all PWA projects should be made on a basis of percentage-of-cost of the entire project of from 30 to 45 per cent, in order to encourage the various municipalities to advocate further this type of economical construction.

## HANRAHAN CO. LOW ON MODOC GRADING JOB

**Portland Contractor Bids Siskiyou Project; Proposals on 6 Contracts Opened**

SACRAMENTO, May 26.—Low bids aggregating approximately \$510,000 were received here today by the State Highway Commission on a variety of projects located in six Northern and Central California counties.

Hanrahan Co., San Francisco, at \$192,283 submitted the lowest of eight proposals for grading and surfacing about 10 miles in Modoc county between Alturas and 1.4 miles west of Hot Creek. Hemstreet & Bell, Marysville, was a close second low bidder at \$192,435.

For grading approximately 20 miles in Siskiyou county between Cougar and Macdoel, Harold Blake of Portland, Oregon, was low bidder at \$171,882.

### Tuolumne Surfacing

Bearman & Jones and A. R. Maestratti, Stockton, submitted a low proposal of \$57,890 for surfacing about 6.2 miles in Tuolumne county between Stoddard Springs and McCoy Saddle.

Griffith Co., Los Angeles, was low bidder at \$42,521 for surfacing and constructing borders on about 8.6 miles in Kings county between Kings River Slough and Hall's Corner.

For applying seal coat on about 20 miles in Plumas county, between Howells and a quarter-mile south of Keddie, Hayward Building Materials Co., Hayward, submitted a low bid of \$30,870.

Lee J. Immel, Berkeley, at \$14,881, submitted low bid for surfacing and applying seal coat on 3.8 miles between Route 86 and Morgan Springs in Tehama county.

## ARCHITECTS MOVE TO NEW QUARTERS

Architects Masten & Hurd announce the removal of their offices from 233 Post street to 412 Post street. The telephone number at the new offices is SUTTER 6818.

## CHAS. F. UNGER LOW ON HANGARS

SACRAMENTO, May 25.—Charles F. Unger, 2426 7th avenue, Sacramento today submitted a low bid of \$26,895 to Architect Charles F. Dean for construction of two hangars at the Sacramento municipal airport. Second and third low bidders, respectively, were H. W. Robertson, Sacramento, at \$26,989; and M. R. Peterson, Sacramento, at \$28,450.

The hangars will be of corrugated iron with steel trusses and concrete floors. They are to be constructed for the Widows and Orphans Aid Association of the Sacramento police department.

## Institute Schedules Steel Bridge Award

For the ninth consecutive year, the American Institute of Steel Construction will award prizes to bridges judged the most beautiful built of steel in the United States.

The announcement of the selections for this year will be made next month by a jury of nationally known architects and engineers appointed for that purpose. Photographs of all bridges to be submitted in the competition must be received by the Institute at its executive offices, 200 Madison avenue, New York N. Y., not later than June 19.

### Three Awards

There will be three prize winners, selected from bridges of three different groups.

Group A will include bridges costing \$1,000,000 or more to build; Group B will include bridges costing between \$250,000 and \$1,000,000, and Group C will include those bridges costing less than \$250,000.

Only bridges opened to traffic during the calendar year 1936 will be eligible. Those bridges selected as the most beautiful in each group will later be decorated with a stainless steel plaque donated by the American Institute of Steel Construction.

## LARGE ALAMEDA CONTRACT OUT FOR PROPOSALS

**Bids on Glenn, Shasta, Tulare Projects to Open on June 16**

SACRAMENTO, May 25.—Contracts for which more than \$1,000,000 has been programmed by the State Division of Highways were authorized for advertising here today, as the State Highway Commission continued placing its 1937-38 program out for bids.

Largest of the projects advertised today involves grading approximately nine miles between Greenville and Mountain House in Alameda county. Major bidding items include 1,875,000 cubic yards roadway excavation, 25,950,000 sta. yds. overhaul, and numerous others. The road will be surfaced with road-mix surfacing. Bids open June 16 in Sacramento.

Bids also will be opened here June 16 on the following projects:

Glenn county: Grading and surfacing with asphaltic concrete portions of seven miles between Willows and Artois.

### Steel Stringer Bridge

Tulare County: Constructing a steel stringer bridge with concrete deck across Kaweah river, three miles south of Woodlake. The bridge will consist of three 39-ft. spans, one 36-ft. span, and two 31-ft. 6-in. spans.

Shasta County: Furnishing mineral aggregate and screenings on about 34.5 miles between Antler and the northerly boundary.

## EMERSON INITIATES NEW SERVICE POLICY

The Emerson Electric Mfg. Co., St. Louis, Mo., announces the establishment of a new Field Service Station policy, effective May 1, 1937. Forty-one firms have been appointed authorized Emerson Electric Service Stations for their respective territories, and in the future they will handle all repairs on motors, either within or beyond the guarantee period.

A list of these names and addresses will be furnished by Emerson Electric upon request for Data Sheet X2042.

## STATE LEGISLATURE JOINS DRIVE FOR TWO-YEAR EXTENSION OF PWA

Approved by both houses of the California legislature, a joint resolution memorializing President Roosevelt and Congress to extend the Federal Public Works Administration for an additional two years and to insure earmarking of at least \$350,000,000 for expenditure through PWA, today was scheduled to be transmitted to Washington by Governor Merriam.

The resolution embodies the basic principles endorsed by both Northern and Central California Chapters, Associated General Contractors, and is supported generally by members of the construction industry.

Text of the resolution follows: WHEREAS, Under existing law the life of the Federal Public Works Administration will expire by limitation on June 30, 1937, and

WHEREAS, There has been achieved a remarkable record of accomplishment by this Federal agency in providing useful employment and the construction of needed and permanently useful public works in the form of school buildings, sewage disposal plants, municipal utilities, and other forms of public projects in every community and to the extent of many thousands in number of such projects; and

WHEREAS, Under the plan of local financial cooperation of the Federal Public Works Administration of loans and grants, hundreds of local communities in the State of California have proceeded in good faith with the voting of bonds, levying of special taxes, and other advance expenditures and commitments in anticipation of loans or grants of Federal PWA funds; and

WHEREAS, All these local communities will be deprived of these public works unless there is a continuance of PWA; and

WHEREAS, The record of performances of PWA has demonstrated that it is the most successful and desirable of the Federal public works program in providing maximum relief employment both on the site of the work and in the mills, factories and sources of production, the survey of the Federal Department of Labor showing that for every person directly employed, three more persons were engaged in producing materials and supplies; and

WHEREAS, It is now thoroughly proven that the prosperity of the nation depends upon the stimulation of the normal channels of business and trade, thereby increasing private employment in the heavy goods and construction industries rather than in any form of temporary direct relief; and

WHEREAS, The most desirable form of relief is to keep our employable off relief rather than to take them off after they are on; and

WHEREAS, The plan heretofore in effect in PWA of allowing a grant of Federal funds up to a maximum of 45 per cent has proven the most feasible, desirable and practical of all plans in that it

means the local community also bears its share of the load; and

WHEREAS, The payment of prevailing wages as against a dole, and the pride and contentment of the worker engaged in useful work adds to the prosperity and comfort of the community as well as to its actual development as a part of our great State; now, therefore, be it

RESOLVED by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California hereby respectfully petition the President of the United States and the members of the Congress to extend and continue the existence of the Federal Public Works Administration for an additional two years after June 30, 1937; and be it further

RESOLVED, That the sum of not less than \$350,000,000 of the one billion five hundred million carried in the pending Federal relief bill be specifically set aside and earmarked for the continuance of PWA loans and grants on the percentage of cost basis which has proven so successful in the past; and be it further

RESOLVED, That we urge this legislation include a specific provision that artisans and workers may be employed through organized labor and local and Federal employment services without the necessity of first declaring themselves as indigents or relief clients; and be it further

RESOLVED, That we urge that the proven plan of grants on a percentage of cost ranging from a minimum of 30 per cent to a maximum of 45 per cent be also incorporated therein; and be it further

RESOLVED, That we respectfully urge the Congress to take prompt action thereon to the end that the many pending projects already approved and on which plans are fully prepared and all preliminary work fully completed may be placed under construction as quickly as possible; and be it further

RESOLVED, That the Governor of the State of California is hereby requested to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House to the members of the committee on appropriations of the House, to the members of the committee on finance of the Senate, and to the Senators and Representatives of the State of California in the Congress.

## S. F. BUILDING EMPLOYS 7100, SURVEY SHOWS

### Construction Gains Reflected In Semi-Annual Figure

Completing its semi-annual survey of San Francisco building projects, the field force of the Industrial Association of San Francisco found more than 7,000 building trades mechanics at work, according to Managing Director Albert E. Boynton.

This is the highest total recorded since the association began its surveys in 1930, with the exception of the figure for May last year, when work on the San Francisco-Oakland Bay Bridge and the Golden Gate Bridge was at its height, Mr. Boynton said.

#### Double 1930 Total

The semi-annual figures compiled by visits of Association representatives to every building and construction job in the city show 7161 mechanics at work at the present time—only 252 less than the high point a year ago. Today's total is more than twice the number employed in May, 1930, and more than three times the number at work in May, 1931, five years ago when employment in the building trades was at its lowest ebb.

Home construction is absorbing the greatest number of building trades workers at the present time, with a total of \$3364. Carpenters, as usual, lead all the other crafts in employment with a total of 1,724, and laborers are second with a total of 1624.

Despite the fact that this month's survey shows 252 fewer men employed, there has really been an increase in general building activity because the May, 1936, figures included hundreds of mechanics employed on the San Francisco-Oakland and Golden Gate bridges who have been retired from those projects because of their completion.

### FIVE NEW INSULITE FOLDERS AVAILABLE

Several new folders illustrating its product have been issued recently by the Insulite Co., Builders' Exchange building, Minneapolis, Minn., and now are available to interested contractors. A series of three mailing pieces entitled "Parade of Modern Interiors" pictures results obtained with interior finish products. Two folders deal with "The Insulite Wall of Protection," one containing six questions and answers, the other demonstrating methods followed in laying out, applying and treating joints and surfaces. The firm will send copies upon written request.

## REA PROJECT FOR LASSEN IS PROPOSED

### Property Owners Organize to Construct New Rural Lines

Residents of rural areas in Plumas, Sierra and Lassen counties, not now receiving central station power, have associated themselves together for the purpose of providing their communities with electric service.

The organization plans to build some 200 miles of transmission and distribution lines to serve approximately 700 consumers.

Power will be bought at wholesale rates from existing utilities, or generated by the co-operative and distributed to the members at cost.

#### Seek REA Funds

Allan Sickler, chief engineer for the project, with offices in Alturas, Calif., will leave shortly for Washington, D. C., where he will make formal application to the Rural Electrification Administration for funds with which to finance the construction of the project.

Engineering work on the Surprise Valley Electrification Corporation's project, for which Mr. Sickler is also engineer, and which is engaged in providing electric power for rural communities in Modoc and Lassen Counties, Calif., and Lake County, Oregon, is progressing rapidly and it is expected surveys will be completed this week.

Plans and specifications for the construction of this project, which includes a 900-h.p. diesel-electric plant and 350 miles of transmission and distribution lines are expected to be completed in about a month.

#### IN NEW QUARTERS

Contractor D. W. Nicholysen, formerly located at 550 Blossom Way, San Leandro, has moved to new quarters at 357 Twelfth street Oakland, he announces. The new telephone number is Glencourt 6526.

## S. F. BUILDING REACHES NEW 1937 PEAK; PERMITS TOTAL \$2,248,000

Reaching a new high for the year and topping every May since 1931, the San Francisco building permit total reached \$2,248,419 this month, according to figures released by Chief Clerk S. J. Rosenblum of the Central Permit Bureau.

In all, 805 permits were issued for all types of construction.

The \$2,248,419 figure was higher than any May permit total since

1931 when permits for construction estimated to cost \$2,853,671 were issued.

The total this month was approximately \$250,000 higher than the May, 1936, figure of \$1,982,633. Eight hundred and five permits were issued this May as compared to 617 for May, 1936.

#### Frames Over \$1,000,000

For the third consecutive month in 1937 the frame building total passed the million dollar mark. This month 240 permits were issued for frame construction valued at \$1,010,076. This was about \$200,000 higher than the May, 1936, frame total of \$865,315.

It was higher than any frame construction total for the month of May since 1929, when permits for construction costing \$1,198,718 were issued. Comparative frame construction totals for 1937 are: January, \$563,126; February, \$716,300; March, \$1,084,678; and April, \$1,137,190.

The building permit total for all types of construction was approximately \$200,000 higher than the March figure of \$2,091,928, the previous high for the year. Other monthly totals are: January, \$1,295,375; February, \$1,219,567; and April, \$1,972,372.

#### 3680 Permits Issued

A tabulation of permit figures for the first five months of 1937 reveals that 3680 permits have been issued for construction costing \$8,757,661. This is almost \$2,000,000 higher than the five month total for 1936 which was \$6,811,594. In the first five months of 1936 3,021 permits were issued.

Included in the 1936 figure are two permits for Golden Gate Bridge and 1939 Exposition work costing \$483,070 in the aggregate. During the entire year of 1936 four permits were issued for World's Fair construction costing \$2,951,514. To date, this year, four permits have

been issued for work estimated to cost \$480,999. This figure should be swelled next month when permits for several large jobs on Exposition Island for which bids have been taken will be asked.

The May, 1937, total of \$2,248,419 is in keeping with the usual trend in building. A check of figures for past years shows that building in San Francisco usually hits its first peak in May, dropping off during the summer, and regaining its stride in September or October.

#### Totals Classified

Following is a classification of permit figures for May, 1937, and May, 1936:

Class	May, 1937		May, 1936	
	No.	Est. Cost	No.	Est. Cost
A	4	\$ 122,900	1	\$ 40,000
B	...	...	1	80,000
C	...	110,500	12	161,443
Frames	240	1,010,076	162	865,315
Alter	551	635,746	438	243,483

## Hemstreet & Bell Low at \$155,875 for Mendocino Grading; Bechtel Bids Span

SACRAMENTO, June 2.—Hemstreet & Bell, Marysville, at \$155,875.20, submitted the low bid to Chief Engineer C. H. Purcell of the State Division of Highways, for grading and surfacing 3.1 miles of highway in Mendocino County, largest of seven jobs costing \$314,890 in the aggregate, for which bids were opened here today.

Location of the work is between Sapp Creek and Pepperwood School in Mendocino County. Second lowest bidder was D. McDonald, at \$155,875.20, followed by Plombo Brothers and Company, at \$161,572.60.

Second largest job for which bids were opened today, was for the construction of a reinforced concrete girder bridge across Spanish Creek near Quincy, Plumas Co. The bridge will consist of two 30- and six 40-foot spans.

### Bechtel Low

Low bidder on the job was S. D. Bechtel, San Francisco, who submitted a bid of \$41,750.50. F. C. Amoroso & Son was the second lowest bidder, at \$43,925.50, with F. O. Bohnett, third, at \$45,282.18.

Basch Brothers, Torrance, submitted the low bid of \$27,736 to State Engineer Purcell for grading and applying road-mix surfacing on about 2.2 miles between Bishop and Owens River in Inyo county.

Oswald Brothers, Los Angeles, were second lowest bidders, at \$33,022.50, followed by Young & Son Company, Ltd., of Berkeley, at \$33,210.70.

### Contra Costa Job

Frederickson & Watson Const. Co. and Frederickson Brothers, at \$26,613.40, submitted the low bid for about 3.5 miles surfacing with plant-mixed surfacing and constructing and oiling the shoulders between Walnut and 3.5 miles northerly in Contra Costa County.

Jones and King were the second low firm, at \$27,145. Next was Leo F. Piazza, at \$28,306.40.

Four firms submitted bids for surfacing with plant-mixed surfacing and constructing and oiling shoulders on about 3.2 miles of highway between Warm Springs and Irvington in Alameda county, with Jones & King, Hayward, low at \$23,173.75. Other bidders were: Union Paving Co., \$24,978; Leo F. Piazza, \$25,407.25; Chas. L. Harney, \$26,185.

### Monterey Surfacing

Fewest bids were submitted for road-mix surfacing and seal coat on shoulders, and seal coat on portion of existing pavement on about 25.7 miles of highway between San Ardo and King City and between Santa Rita and the northerly boundary, in Monterey County.

Of the two bids submitted, L. A. Brisco, at \$22,251, was low. The Granite Construction Company of Watsonville put in the other bid, at \$22,543.

The smallest job for which bids were opened here today attracted the largest number of bidders. Ten firms submitted bids for grading and applying road-mix surfacing on about eight-tenths of a mile of

## SUNSET ROOFING BIDS POSTPONED

Bids for construction of lining, roof and control works at Sunset reservoir, scheduled for opening June 23, again were postponed by the San Francisco Public Utilities Commission yesterday. The new opening date is July 8.

The second postponement, officials indicated, was authorized as a courtesy to contractors who are figuring the bay Bridge interurban rail terminal contract, for which the State Department of Public Works will open bids June 16. The reservoir lining and roofing contract is the last major job in the city's current program of enlargement of storage facilities.

## Prepare Agreement On Treatment Plant

City Attorney John J. O'Toole this week is expected to draw up an agreement between the Park Commission and the Department of Public Works which will lead to the construction of the Richmond-Sunset Sewage Treatment Plant and a trans-park pipe line, officials announced Saturday.

The plant, to be located in the southwest corner of Golden Gate Park is estimated to cost \$450,000 by City Engineer John J. Casey. The trans-park line which will carry sewage from the Richmond sewage tunnel, now under construction, to the plant, will cost about \$60,000. Plans and specifications for the projects are completed, and action awaits the signing of an agreement between the Park Commission which has jurisdiction over Golden Gate Park, and the Department of Public Works, designers of the project.

Just published by the McGraw-Hill Book Company, 330 West 42nd street, New York, is volume one of the three volume set, "Reinforced Concrete Construction."

This is the fourth edition of volume one, "Fundamental Principles," and is entirely up-to-date, according to the publishers. Originally written by George A. Hool, the book has been revised by H. E. Pulver. The price is \$4.00.

## DEATH CLAIMS C. H. SNYDER, S. F. ENGINEER

Noted Consulting Engineer  
Dies at 71; Spent 35  
Years in S. F.

Death last week brought to a close the career of Christopher Henry Snyder, 71, bay region consultant for more than two decades and one of America's most distinguished structural engineers.

Funeral services were held Friday for the man who designed scores of San Francisco buildings and left his mark on the engineering profession from New York to Honolulu.

Born in Fulton, Illinois, in 1866, he attended the University of Illinois, graduating with a B. S. degree in civil engineering. After graduation he worked for many of the nation's largest firms as draftsman and consultant until 1901.

In that year he went to Honolulu where he acted as a contracting engineer for two years.

### Contracting Engineer

In 1902 he first took up residence in the bay region. He was a contracting engineer for 10 years, then in 1912 opened an office as a designing and consulting engineer.

It was during his career in San Francisco that he invented and patented the "Flat slab-steel frame."

He aided in the designing of many of the region's most important structures, the San Francisco city hall being the most widely known. For the Panama-Pacific Exposition he designed the Horticultural Building.

He was noted as a designer of school buildings, aiding with plans for twenty-five modern schools for the San Francisco Board of Education, alone. Other outstanding examples of his work in this field are to be found at Stanford University where he designed dormitories and other structures.

**Federal Office Building**  
One of his most recent projects was the new Federal Building in the Civic Center.

Honored by his profession, he was past-president of the Engineers' Club, the San Francisco Section of the American Society of Civil Engineers, the Structural Engineers' Association of Northern California, and the Pacific Association of Consulting Engineers.

He was also a member of the Commonwealth Club, the Kiwanis, the Claremont Country Club, and the Mt. Diablo Country Club.

He is survived by his wife, three sons, Henry R., William C., and John Robert Snyder, and a daughter, Helen Snyder Wood.

Shipments of fire extinguishing equipment for April, 1937, amounted to 74 units, a substantial gain over the shipments totalling 53 for the same month in 1936, according to the monthly report of the Bureau of Census.

**PLANNED** June 2, 1937.  
 CHINO, San Bernardino Co., Calif.—Federal grants totaling \$1,527,695, for starting construction of a state prison for first offenders near Chino, were approved this week in Washington. The grants, together with a pending state appropriation of \$2,000,000, will finance the first year's construction of a proposed 3½-year building program. Total estimated cost of which is \$9,541,143. The program will operate under a series of WPA projects. Preliminary plans contemplate a prison to house 3500 in five large cell blocks and 58 dormitories. In addition to prison buildings, which will be reinforced concrete structures, the first year's program calls for construction of walls and fences, shop, warehouse and office building, and for installing water, sewage, steam heating and drainage systems. A. R. Walker and F. A. Elson, 708 Pacific Commerce Bldg., 437 S. Hill St., Los Angeles, are the architects for the project and have prepared preliminary plans, which were prepared after an extensive survey by the architects of prisons throughout the country.

## Atlas Air Conditioning Oil Burning Furnaces for Warm Air Heating

The low cost of oil in many localities, together with its ease of handling and many other advantages, make it an ideal fuel for use in heating and general air conditioning. To give residents and building owners in such localities the full benefits of these advantages, ATLAS has designed an improved modern type of air conditioning unit. It consists of an ATLAS Oil-Burning Furnace of high efficiency, an ATLAS Blower Fan of the latest centrifugal multi-stage type for air conditioning use, and provision for Air Filter, Humidistat, Automatic Controls, etc. as desired. This combination of ATLAS equipment is the very best work in modern year-round comfort and health protection. It ventilates in summer, warms in winter; provides a constant supply of pure, fresh, filtered air year around, and forces the circulation of this air rapidly, positively, and evenly to every part of the house. ATLAS Automatic Controls eliminate all work and bother; operation is quiet, unobtrusive; and results are ABSOLUTELY DEPENDABLE. ATLAS' 28 years of leadership and thousands of satisfied customers assure you. Buy an ATLAS and be SURE of these benefits — at an actual money saving.

## SOUTH TOWERS FOR '39 FAIR OUT FOR BIDS

### Utilities Commission Adver- tises Annual Contract for Street Repaving

Four contracts, which probably will amount to more than \$100,000 in the aggregate, were advertised for bids yesterday by the San Francisco Public Utilities Commission.

Largest of the group is for construction of the South Towers for the 1939 exposition on Yerba Buena Shoals.

Bids on the exposition contract will be opened June 23 by the commission, as will proposals for the annual water department repaving contract and for installing an air conditioning system in the San Francisco Water Department Bldg.

#### Re-shingling Cottages

The fourth contract was advertised informally, with bids to be opened June 15. It involves re-shingling of the Pilarcitos and Crystal Springs cottages in San Mateo county.

The exposition tower contract calls for construction of the two south towers of the main exposition group. They will be wood frame structures, about 104 feet in height, and will rest on pile foundations.

The structures are temporary exposition buildings, serving chiefly as the basis for decorative motifs for the finished South Court No. 4. They will have wood sheathing, wood floors and decks, and composition roof covering.

The annual street repaving contract calls for repaving streets and sidewalks at various locations in San Francisco where necessary activities of the water department have disturbed the existing pavements.

The contract, approximately the same from year to year, last year was awarded to Lowrie Paving Co., at \$34,514.

The air conditioning system, for which bids also were invited yesterday, is to be installed in the San Francisco Water Department's office building at 425 Mason street.

### ROBERTSON BIDS WEIMAR HOSPITAL

WASHINGTON, D. C., June 9.—H. W. Robertson, 3004 "F" street, Sacramento, today submitted a low bid of \$52,898 to the Interior Department for construction of a hospital building and employees' cottage at Weimar, Sacramento Agency, 14 miles north of Auburn. Second low bidder for the contract was Willis F. Lynn, Oakland, at \$60,577.

The hospital building will be one story in height, of frame and stucco construction, and will consist of a center block and two wings. The cottage is to be a one-story frame and stucco structure.

### Award Hickam Field Electrical System

WASHINGTON, D. C., June 9.—The War Department announced today award to H. H. Walker, Inc., 1323 Venice boulevard, Los Angeles of the contract for construction of the electric distribution system at Hickam Field, the Army's new air base in Hawaii.

Amount of the contract price, it was announced, is \$191,300.

The price, apparently, was the result of the addition of Alternate II to the main proposal. Walker's low bid on Proposal I was \$183,600, and his bid on the alternate was \$7,700.

The alternate is an addition for constructing an electrical distribution system at Fort Kamehameha.

### FLOOR CONTRACTORS WILL MEET TONIGHT

Members of the Hardwood Floor Contractors' Association will hold their regular meeting tomorrow evening at San Francisco Builders' Exchange, President Edward Hanley announced yesterday.

The meeting will start promptly at 8 P. M. President Hanley said. Members are requested to be at the exchange, 666 Mission street, at the scheduled time.

## CAMPBELL BIDS STOCKTON STATE HOSPITAL WORK

### Sacramento Firm Submits \$49,722 Low Bid on Gen- eral Contract

SACRAMENTO, June 8.—Campbell Construction Co., 800 R street, Sacramento, today submitted the lowest of four general bids to State Architect George B. McDougall for construction of additions and alterations to the kitchen building and constructing a new boiler plant at the Stockton State hospital farm.

Amount of the low proposal was \$49,722.

Complete bids on the general contract were as follows:

Campbell Const. Co.	\$49,722
Arthur Pinner, Los Angeles	51,978
Fred J. Early, Jr., S. F.	52,972
K. S. Parker Co., S. F.	74,000

#### Plumbing, Heating

Scott Co., Inc., 243 Minna street, San Francisco, was the only bidder for plumbing and heating. The firm's proposal was \$5,277.

Three bids for electrical work were received, the lowest being \$995, submitted by Collins Electrical Co., 708 E. Market street, Stockton.

Other bidders for electrical work were Eddy Electrical & Mechanical Co., Stockton, at \$1370, and Spencer Electric Co., San Francisco, at \$1,557.

Plans for the work were prepared in the office of State Architect McDougall. The boiler plant building is to be constructed around the existing boiler equipment.

### EXHIBIT CEMENTED CARBIDE TOOL FILM

The American Cutting Alloys, Inc., 500 Fifth avenue, New York N. Y., has exhibited before private groups in New York and Philadelphia its new imported motion picture film on the "Manufacture and Use of Cemented Titanium-Tungsten Carbide Tips and Tools in High Speed Cutting of Steel and Cast Iron."

## 5 Billion Man-Hours' Work Created, PWA Officials Estimate, as Fourth Year Ends

Work approximating five billion man-hours at the construction site or in production, fabrication and transportation of required building materials has been created by the Federal and non-Federal Public Works Administration projects.

This was revealed this week by statistical analysis as PWA nears its fourth Birthday Anniversary June 16.

The figure does not include a huge amount of additional labor created in supplying demands for consumers' goods and services.

### Indirect Labor

The five billion man-hours figure was computed from the established fact that for every man-hour of labor at the site of construction, two and a half man-hours were created in primary indirect labor (the production of materials). The primary indirect ratio was established by the Bureau of Labor Statistics of the Department of Labor after months of analyzing contractors' and manufacturers' records.

Other statisticians have calculated that for every man-hour of labor at the site of construction, an additional two man-hours of so-called secondary indirect labor was created. In other words, men furnished employment either directly or indirectly by Public Works Administration projects were enabled to buy food, clothing, and other necessities which would otherwise remain unconsumed or unpurchased because of lack of wages. Should this ratio be accepted, PWA may be said to be responsible for more than seven billion man-hours of employment.

Figures revealed in the State breakdown, which appears at the end of this article, revealed only the man-hours of labor which have been recorded as occurring at the site of construction. One cannot determine the number of indirect man-hours created in the factories, mines and forests of that particular State merely by multiplying the State total by two and a half for the reason that steel used in an Alabama school may be mined in Minnesota, fabricated in Pennsylvania, and transported through a dozen States. Likewise, the Alabama worker may eat breakfast food made in New York from grain grown in Kansas, and sleep in a night-shirt made in Massachusetts from cotton grown in Texas.

### 1,428,000,000 Man-Hours

Statisticians of the Public Works Administration have discovered that by June 16, 1937—PWA's 4th anniversary—there will have been created 1,428,000,000 man-hours at the site of the construction of thousands of schools, waterworks, sewers, post offices, bridges, and the like. There will have been created 3,570,500,000 man-hours in the production of raw materials, their transportation and fabrication. An estimated additional 2,876,000,000 man-hours will have been created in supplying the demand for consumer's goods and services.

The following figures are based upon "cold facts" recorded from the

### MATERIAL PRICE LEVEL ADVANCES

Average wholesale prices for building materials advanced 0.3 per cent during the week ended May 29, according to the weekly price summary of the U. S. Bureau of Labor Statistics. The increase was the largest shown by any group of commodities during the week.

Largely responsible for the increase, according to the bureau, were higher prices for millwork, copper sheets and laundry tubs. Brick, tile, cement and structural steel remained at the level of the preceding week. Paint and paint materials, yellow pine flooring, lath and red cedar shingles showed fractional decreases. The index stood at 97.2 per cent of the 1926 level.

## Advertise Nevada Grading Contract

Bids for grading and surfacing about 14 miles in Churchill county were invited this week by the Nevada State Highway Directors, State Highway Engineer Robert A. Allen announced.

Bids will be opened in Carson City June 24.

The project is located between the Lyon-Churchill county line and approximately 14 miles east, on Route 1, Section A-1. Major items include 113,430 cubic yards roadway excavation; 70,430 cubic yards borrow; removing and stockpiling 154,182 square yards roadmix surface; 117,470 tons Type 1 gravel base; 56,840 tons Type 2 gravel base; 11,580 tons gravel surface; 5,172,000 gallons water, and others.

date of PWA's creation by Congress in June of 1933, to May 1, 1937, and list by States the man-hours of employment provided at the construction sites of Federal and non-Federal projects in seven Western States:

State	Man-hours
California	68,398,610
Arizona	23,032,366
Nevada	11,547,220
Oregon	25,601,385
Washington	27,222,129
Utah	9,554,036
Idaho	9,736,782

## BOHNETT LOW ON DEL NORTE SPAN CONTRACT

### State Opens 14 Proposals on Four Highway Projects

SACRAMENTO, June 9.—Fourteen contractors today submitted bids to State Highway Engineer C. H. Purcell on four State construction projects costing \$138,727, in the aggregate.

Largest of the four highway contracts, for the construction of a reinforced concrete bridge across Myrtle Creek, about 10 miles north of Crescent City, attracted only one bidder.

The lone bidder was F. O. Bohnett of Campbell, whose offer was \$50,644.50. The bridge will consist of eighteen 15-foot slab spans on an open spandrel arch and concrete bents and abutments. The contract also calls for grading and treating with a s p h a l t surfacing about 0.24 mile of roadway.

### Twenty-Five Items

The contract included 25 items. Principal items were: 5,300 cubic yards of unclassified excavation; 152,000 pounds of reinforcing steel; 600 cubic yards of Portland cement and 500 cubic yards structural excavation.

Six firms bid on a contract for surfacing with road-mix surfacing and applying seal coat to 16.1 miles of roadway in Plumas County, with Frederickson & Westbrook of Lower Lake, low at \$37,004.

The location of the work was between the Feather River Inn and Beckworth.

The second lowest bidder was George French, Jr., Stockton, at \$45,820, followed by Harms Bros. of Richfield, at \$46,466. Other bidders were: Pacific States Const. Co., San Francisco, at \$46,636; A. Soda & Son, Oakland, at \$49,389, and E. A. Forde, San Anselmo, at \$51,470.

### Madera Underdrains

The third largest job for which bids were opened here today was for installing underdrains on about eight miles of highway in Madera county, between Kelshaw Corners and Course Gold.

Only two contractors bid the job, with Milton A. Purdy, Oakland, low at \$27,958.70. The other bidder was Bodenhammer Const. Co., at \$29,469.

Lee J. Immel, Berkeley, at \$23,118.50, submitted the low bid to State Highway Engineer C. H. Purcell for grading and surfacing with crusher run base and road-mix surfacing about 0.7 mile of highway in Shasta County at China Gulch.

Five contractors submitted bids with Piazza & Huntley, San Jose, at \$23,182.75, second low, followed by J. P. Brennan, Redding, at \$23,673.00. Other two bidders were: Louis Bissotti & Son, Stockton, at \$28,627.25, and A. Soda & Son, Oakland, at \$29,258.80.

GLYPTAL

AN INSULATED CABLE THAT'S OILPROOF

FOR USE in oily locations, where resistance to abrasion is not important, G-E offers a cable with a rubber-like sheath known as Glyptal. This material is absolutely unaffected by oil, gasoline, acids and ordinary solvents.

When it is intended to subject the cable to rough portable uses, the sheath can be protected with a strong, tough, treated-braid reinforcement. You can get G-E insulated cable in every type, size and voltage. See your nearest G-E jobber, or G-E sales office. General Electric, Schenectady, N. Y.

## MacDonald & Kahn Low

### GRANFIELD-FARRAR & CARLIN LOW FOR ALTAMONT PASS GRADING JOB

SACRAMENTO, June 16.—Granfield-Farrar & Carlin, San Francisco, today submitted a low bid of \$848,193.40 to the State Highway Commission here for the difficult Greenville-Mountain House sector of the Altamont Pass highway in Alameda county.

A close second bid was submitted jointly by Fredrickson & Watson and Fredrickson Bros. and Heafey-Moore Co., Oakland, at \$850,299.

The commission also received proposals on three other contracts, largest of which was for grading and surfacing about seven miles between Willows and Artois in Glenn county.

#### Total Bids

Total bids on the nine-mile Altamont Pass job were as follows: Granfield-Farrar & Carlin, \$848,193; Fredrickson and Watson,

Fredrickson Bros. and Heafey-Moore Co.,	850,299

D. W. Thurston, L. A.,	1,139,224

#### Ball Low Twice

Low bidder for the Glenn county contract was N. M. Ball Sons, Albany, with a proposal of \$193,693. Union Paving Co., San Francisco, at \$201,760 was second low.

N. M. Ball Sons also submitted the lowest of seven bids for constructing a steel stringer bridge across Kaweah river about three miles south of Woodlake, Tulare county. Amount of the low bid was \$27,331.

### PURCELL WILL MAKE OFFICIAL ANNOUNCEMENT

Completed Totals to Be Revealed at Sacramento This Morning

By HARRY SPALDING

MacDonald & Kahn Co., Ltd., are low bidders for construction of the San Francisco - Oakland Bay Bridge Railway Terminal, an unofficial tabulation of bids indicated yesterday.

Official totals on all contracts will be announced in Sacramento today, the San Francisco-Oakland Bay Bridge Commission announced.

An unverified tabulation of figures listed bidders in the following order:

MacDonald & Kahn Co. Ltd., San Francisco.

George A. Fuller Company, Los Angeles.

Barrett and Hilp, San Francisco, and A. Teichert & Son, Inc., Sacramento.

Clinton Construction Company, San Francisco.

\$1,658,510 Bid

The low basic bid totaled approximately \$1,658,510, according to MacDonald and Kahn Co., Ltd. The alternate bid which calls for the construction of the buildings, omitting extensive garages in the west end of the terminal, was about \$1,552,020.

The tabulation indicated that the Columbia Steel Company was low bidder for structural steel work. Their basic total was approximately \$442,360, with an alternate total of about \$435,620. The report listed Bethlehem Steel Company as second lowest bidder, followed by George A. Fuller Company.

The bid of George A. Fuller Co., only firm to bid on Proposal F for the entire job, was higher than a combination of other proposals submitted by various bidders on different portions of the work, it was understood.

### RUBY DAM CEMENT

Bids for furnishing cement to be used in construction of the first unit of the \$4,500,000 Ruby Basin Dam will be opened July 1, the Seattle board of public works announced this week. Proposals for the general construction contract are scheduled for opening the same day.

The cement contract, as advertised this week, calls for furnishing approximately 275,000 barrels of bulk cement and 1000 sacks of cement. Specifications and proposal forms may be obtained from the City Light Department, 216 City Light building, Third and Madison streets, Seattle.

### SHIP ROOF DECK TO AFRICA PLANTATION

Detroit Steel Products recently received an order for a large shipment of Fenestra Holorib Steel Roof Deck to be shipped to Cavalla, Liberia, West Africa, for installation by American Bridge Co., in a factory and warehouse being built by Firestone Plantation Co. Active foreign demand is reported for Fenestra roof deck and steel windows, according to Wm. Gillet, manager of the Holorib Department of Detroit Steel Products Co.

Fenestra Holorib Insulated Roof Deck has been shipped recently to such far distant points as Venezuela, South America, and Honolulu, T. H.

## MARE ISLAND DRYDOCK BIDS OPEN JULY 28

**Bid Opening Date Announced  
for \$3,500,000 Navy  
Project**

Bids for construction of the \$3,500,000 graving dry dock at Mare Island will be opened in Washington July 28, the Navy Bureau of Yards and Docks has announced.

Long sought by Pacific Coast interests, the Mare Island dry dock will be one of the largest single contracts to be let this year in the Bay area.

To be of reinforced concrete construction on pile foundations, the dock will be located south of Cradle No. 2 at the Mare Island Navy Yard.

It will be of the cruiser type, capable of docking ships of the 10,000-ton cruiser class.

### 700 Feet Long

The dock will have a length of 700 feet, a width of 114 feet, and will be 40 feet over all in depth.

Work is to include quay walls, crane tracks, pump well, capstan and boiler foundations, manholes, culverts, drains, pipings, railings, and wood floors.

Pacific Coast contractors who have procured plans for the work are Lindgren & Swinerton, Inc., 225 Bush street, San Francisco, and Clinton Construction Co. of California, 923 Folsom street, San Francisco.

Eastern firms who have taken out plans include Warner Const. Co., Chicago; Bethlehem Steel Co., Bethlehem, Pa.; Jones & Laughlin Steel Corp., Chicago; Frederick Snare Corp., New York City; and Crane Co., Washington, D. C.

## CHANGE IN FIRM NAME ANNOUNCED

Change from the firm name of Kingsland Granite Co. to Madera Quarries Company was announced last week by officials of the firm, which quarries and manufactures many types of stone, including granite and marble. Located at Madera, the firm specializes in building and monumental work, its output including sawed slabs, polished slabs and dimension stock.

## State Advertises Eight Highway, Bridge Contracts; Bids Scheduled July 14, 15

SACRAMENTO, June 22.—Bids on eight contracts for highway and bridge construction were invited here today by the State Highway Commission, with proposals for opening in Sacramento and Los Angeles July 14 and 15.

Projects authorized for advertising today are located by counties as follows:

**Colusa and Glenn:** grading and paving with asphalt concrete about five and eight-tenths miles, between Delevan and Logandale.

**Lassen Surfacing**  
Lassen: grading and surfacing with road-mix surfacing and constructing multi-plate arch culverts on about three miles, between Lake Leavitt and Litchfield.

**Yolo and Colusa:** surfacing with bituminous macadam surfacing on about four and three-tenths miles between Zamora and Bretona and between Arbuckle and Geneva.

**Monterey:** constructing a reinforced concrete bridge across Big Creek about 49 miles south of Monterey; the bridge to consist of two 177-foot 6-inch open spandrel arch spans, two 81-ft. 6-in. open spandrel arch cantilevers, and two 34-ft. 6-in. girder spans.

### Southern California

Bids on these four projects will be opened in Sacramento July 14. For the Southern California projects will be opened in Los Angeles July 15. They are:

**Ventura:** constructing a reinforced concrete girder bridge, consisting of one 59-ft. span on concrete abutments, across Sycamore Creek about 10 miles south of Oxford.

**San Bernardino and Riverside:** surfacing with plant-mixed surfacing and applying seal coat on about eight and six-tenths miles at various locations in Dist. VIII.

### Riverside Project

**Riverside:** surfacing with plant-mixed surfacing and applying seal coat on about twelve and one-half miles between San Jacinto and Moreno.

**Imperial:** grading and surfacing with plant-mixed surfacing about four miles between Brawley and Mulberry Avenue.

## SET BAKERSFIELD SCHOOL BUILDING TAX BALLOT DATE

**Voters to Pass on Proposed  
Building Program  
June 29**

The Bakersfield Board of Education this week announced that a special election will be held June 29 to authorize a \$1.40 tax for the Bakersfield School District. The action was made necessary by the passage of a State law limiting districts to a ninety cent tax unless a higher rate is sanctioned by the voters at a special election.

The new tax rate is being asked for a three year period to take care of school building needs without bonding the school district, in keeping with the "pay as you go" policy established by the board several years ago.

Principal project in the program is the \$157,000 Washington Grammar School improvement program.

### Alternate Plans

Plans have been prepared by the architectural firm of Symmes and Willard, Architect Stanton Willard last week presented alternate building plans to the board for the proposed buildings depending upon what portions of the grounds are used for classroom and auditorium.

Should the tax plan be successful at the polls, the money will be used to finance the construction of an industrial art unit and laboratories for the Emerson School as well as the Washington School work. The remainder of the funds will be used to pay, in part, for additions made to the Horace Mann School this year. The balance due for this work is approximately \$35,000, the board announced.

## GRIFFITH CO. LOW ON KERN SPAN, GRADING; FORDE BIDS NAPA WORK

SACRAMENTO, June 23.—Low bids aggregating more than \$265,000 were received here today by the State Highway Commission on five contracts for work in Kern, Napa and Lassen counties.

Largest of the projects involves grading and surfacing about 5.5 miles and constructing a bridge in Kern county between Maricopa and Taft. For this contract, Griffith Co., 502 Los Angeles Railway building, Los Angeles, submitted a low bid of \$128,573.

Second and third low bidders, respectively, were A. Teichert and Son, Sacramento, at \$133,640, and George K. Thompson & Co., Los Angeles, at \$138,793.

Proposals on the project were received by the commission from fourteen contractors.

### Napa Project

For applying crusher run base, plant mixed surfacing and constructing shoulders on about 4.7 miles in Napa county, low bidder was E. A. Forde, 640 Sir Francis Drake boulevard, San Anselmo, with a proposal of \$48,104.

Second and third low bidders for the Napa county job were Jones & King, Hayward, at \$48,150; and Charles L. Harney, San Francisco, at \$48,850. The work is located between Napa and the westerly boundary.

George Pollock Co., P. O. Box 903, Sacramento, submitted a low proposal of \$38,227 for surfacing with crusher run base and applying penetration oil treatment on about 14.2 miles in Lassen county, between Termo and Madeline.

For this contract, J. A. Casson of Hayward, was second low bidder at \$44,265; and A. Teichert & Son, Sacramento, submitted the third low figure at \$44,418.

### Kern Surfacing

Piazza & Huntley, 296 N. Sixth street, San Jose, were low bidders at \$37,931 for constructing bore and surfacing with plant - mixed surfacing on about 5.5 miles in Kern county between Rosedale and Route 141.

Union Paving Co., San Francisco at \$40,445, was second low bidder, while third low figure was submitted by Oswald Bros., Los Angeles, at \$41,860.

Eight bids were received for grading and applying road - mix surfacing on about 2.8 miles at Rademacher, Kern county. Lowest bidder was Basch Bros., 20530 S. Normandie avenue, Torrance, at \$13,495.

Second and third low figures were: Young & Son Co., Ltd., Berkeley, \$14,896; and M. J. Ruddy, Modesto, \$15,905.

(For complete bids on all projects, together with unit prices, see Advance Report section today.)

Shipments of galvanized range boilers during the first two months of 1937 amounted to 210,530 units, as compared with shipments totalling 139,650 for the same period in 1936, the Bureau of Census reports.

## ALTAMONT PASS CONTRACT LET TO S. F. FIRM

### Highway Commission Awards Jobs Aggregating More Than Million

(Special to Daily Pacific Builder)  
SACRAMENTO, June 21—Seven contracts for work costing more than \$1,148,542, in the aggregate, today were awarded by State Highway Engineer C. H. Purcell of the Division of Highways.

To Granfield-Farrar & Carlin of San Francisco, at \$848,193.40, went the contract for grading and surfacing in the Altamont Pass. The work consists of grading and surfacing with crusher run base about 8.4 miles of highway in Alameda county, between Greenville and Mountain House.

Fourteen firms submitted bids for the job. The second lowest bidder was Fredrickson and Watson and Fredrickson Brothers, and Heafey-Moore Company, at \$850,299.05. A. Teichert and Son, Inc., of Sacramento, at \$872,356.25 were third lowest bidders.

The second largest job for which contracts were awarded today, was for grading and surfacing with asphaltic concrete portions of about seven miles of roadway in Glenn county between Willows and Artois. The contract went to N. M. Ball Sons, Albany, at \$193,698.

### Del Norte Bridge

F. O. Bohnett, Campbell, at \$50,644.50, was awarded contract for the construction of a reinforced concrete bridge across Myrtle Creek, about ten miles north of Crescent City. The bridge will consist of eighteen 15-foot slab spans on an open spandrel arch and concrete bents and abutments. Grading and treating with asphalt of about 0.24 mile of approach roads is included in the contract.

To the Southern California Roads Company, Los Angeles, at \$26,244, Purcell awarded contract for highway improvements in Los Angeles and Orange counties, at various locations in District VII. The contract calls for applying road-mix surface treatment to about 33.3 miles of shoulders.

### Armor Coat Job

For placing crusher run base and applying armor coat to about 2.4 miles of highway between Sausal and Dublin, Piazza and Huntley of San Jose, were awarded the contract at the bid price of \$14,847.50.

Contracts were awarded for two minor jobs. The awards were: to Harold Smith, St. Helena, at \$10,254.50, contract for about 3.3 miles surfacing with imported surfacing material and applying penetration oil treatment, and installing underdrains in Napa county, between the summit of Mt. St. Helena and northerly boundary; and to Basch Brothers, Torrance, at \$106,000, contract for grading and treating with liquid asphalt (road-mix method) 0.5 mile of highway in Kern county, near Inyokern.

## PLAN FOR REAL ESTATE BOARDS' MEET ANNOUNCED

### Annual Convention in Pitts- burgh Will Include New Features

Plans being made for the annual convention of the National Association of Real Estate Boards at Pittsburgh in October have been announced by association officials.

The tentative schedule includes two features that are unique in national convention programs of the association:

(1). A special program running through the week devised to "siphon to the man who does a general real estate business the most practical help than can be found for the business conditions he is now entering." This program for the general real estate office will run parallel to sessions for real estate specialists. It will draw from the ideas and experience developed by the association's specialized institutes and divisions.

### Open Afternoon

(2). An afternoon left open mid-week of the convention sessions. This break will give unusual opportunity for inspection of Pittsburgh real estate problems and achievements, and for sight-seeing tours. The Pittsburgh Real Estate Board as convention host has already begun plans to show visiting delegates on this free afternoon phases of the city's development of special interest from a real estate viewpoint.

With Paul E. Stark, Madison, Wis., president of the association in the chair, general sessions of the convention will open Wednesday morning, October 20. The business program will close Friday, October 22.

At the general sessions on Wednesday, election of officers for the coming year will be held. These officers-elect will be installed the following January.

Preliminary meetings of executive boards will precede the convention. Most important of these are meetings of the executive committee and the board of directors of the association, to be held on Tuesday, October 19.

Deep well water system shipments in April amounted to \$275,787, the Bureau of the Census reports, as compared with \$180,341 in March.

## U. S. Structural Steel Industry Prepared To Meet Increased Demand, Iden Reports

In contrast to European steel producers, the fabricated structural steel industry in the United States has a capacity to meet promptly a much larger demand for its output than that existing at present, the Sixth International Conference on Steel Development was told yesterday.

The report on the American industry was submitted over the signature of Secretary V. G. Iden of the American Institute of Steel Construction.

The Conference draws representatives from England, France, Germany, Holland, the United States, and other steel producing countries of the world. The opening session of the Conference was held today in Duesseldorf, Germany. After viewing the Craftsmanship Exposition, the Conference will be adjourned on Wednesday to Paris, where it will continue in session through June 25.

The report of the American Institute of Steel Construction follows, in part:

### Volume Gaining

"Coincident with the announcement of the Government of the United States that it will exercise greater economy and greatly curtail expenditures for public works, the structural steel industry is facing a decided improvement in the volume of business.

"The volume of business of this industry during the past year has approximated fifty-seven per cent of normal (normal being the average annual volume for the years 1928 to 1931, inclusive). The shipments of our industry during the three months of 1937 were nineteen per cent larger than the shipments for the same three months of 1936, while the bookings for these same three months were nine per cent larger than the bookings of the same period last year. The apparent hesitancy in future business results from buyer's apprehensions over prices which have been advancing constantly in recent months.

"During 1936 the structural steel fabricating industry produced over 1,600,000 tons of fabricated structural steel. Thirty-seven per cent of the total went into bridges, including railway as well as highway bridges. Twenty-five per cent went into buildings—governmental, institutional and commercial. A little better than twenty-two per cent went into the erection of new industrial plants. The year 1936 was very active in that direction.

### Small Projects

"Only about three per cent of the fabricated structural steel sold in 1936 is known to have gone into engineering projects. The remainder, approximately thirteen per cent, constituted those odd jobs, all under fifty tons each, that are difficult to classify. In that miscellaneous group are grade crossing projects, repairs and extensions to plants, etc.

"From the point of view of the industry the past year may be considered very happy. It showed

a decided revival of business, insofar as volume is concerned. It also showed that the market for our product is not dependent upon public work appropriations. Bridge building is primarily a local problem. And bridge building is indicative of the trend of traffic problem. It has grown to dominating importance within the past decade. We have reasons to expect that it will become of even greater importance in the next few years ahead.

"Our Institute has now completed its test on the effect of wind on tall buildings which has been in progress during recent years. We have dismantled our equipment used in this work on the Empire State Building at New York City. The test results, covering wind velocities, wind direction, negative and positive pressures recorded on the 33rd, 55th and 75th floors, sway of the tower and wind stresses in tower columns and girders, have been studied and a paper on this will probably be published this fall.

### Stress Distribution

"The Institute also has been interested in promoting a study of the stress distribution in rigid frame knees. This study has progressed to the point where preliminary investigations of two test specimens, one with the angular knee and the other with the curved knee, have been completed.

"A fully welded test specimen designed similar to specimen No. 1, except that the latter was riveted, has been built and is being tested now. The check tests will be correlated with the tests already made on the riveted specimen.

"A set of six small-scale Bakelite models have been built and are being photo-elastically investigated, and it is hoped that a relationship of stress behavior between these six models and the two full sized steel specimens can be established.

"In addition, we are interested in the testing of full frame models of about half the size (for span) of the first two full sized models studied. This additional program may eventually involve the testing of two or three full frames connected by bracing and a floor system.

### Tests Completed

"Tests have been completed of stress behavior in hattle - deck bridge floors and the final report is now being written. It probably will be available this fall.

"In connection with the gross area method of designing plate girders, a test program has been established to show the complete

### ADVERTISE PEARL HARBOR DREDGING

Development of the Pearl Harbor navy base this week advanced further toward completion as the Navy Department's Bureau of Yards and Docks invited bids for dredging in the harbor, to cost an estimated \$1,000,000. Bids on the large dredging contract will be opened in Washington July 14.

Proposals also will be opened the same day for crane-dredge and diesel-electric generating equipment to be installed on pontoons at the Navy Yard in Pearl Harbor.

## Vibrating Increases Pavement Strength, Says Bureau Report

Vibrating the concrete in a pavement as it is laid increases the strength ten per cent, according to a report by the Bureau of Public Roads of the U. S. Department of Agriculture, or, by vibrating, ten per cent less cement can be used, and the same strength maintained. Vibrators work on somewhat the same principle as those used in giving beauty treatments.

The report gives the results of an investigation recently conducted at Arlington, Va. Two hundred and seventy slabs of pavement, each 10 feet wide and 8 feet long, were constructed and tested. Four different types of vibrating equipment were used, their speeds varying from 3,600 to 4,000 revolutions per minute.

### Standard Methods

Slabs of similar composition were placed and finished by standard methods without vibration. Thus, differences in the strengths and physical properties were directly attributable to vibration. In every instance it was found that vibration increased the strength and density and decreased the amount of "honeycomb," or air pockets.

To investigate the effects of vibration further, the quantities of aggregates, cement, and water were varied in slabs finished by the vibration method, and their properties were compared with those of nonvibrated slabs. Slabs 7 and 10 inches thick were placed, and the effects of surface vibration were found to extend entirely through both.

The report, published in the April 1937 issue of Public Roads, describes ways in which existing specifications for pavement concrete can be modified to utilize vibration to advantage.

stress distribution in all parts of riveted plate girders.

"We have also under discussion the possibility of a series of tests to commence this fall whereby the behavior of flanged and webbed splices in riveted plate girders will be investigated."

## APPROVAL DUE ON APPRENTICE TRAINING PLAN

Bill Awaits Merriam Signature;  
Carries a \$25,000  
Allotment

By HARRY SPALDING

Passed by the Assembly and Senate, the State bill for voluntary apprenticeship which incorporates the apprentice training plan into the State Labor Code and provides for an appropriation of \$25,000 to carry out the provisions of the act, this week awaited action by Governor Frank F. Merriam.

The proposed bill has received the endorsement of the Associated General Contractors of America, and practically all labor and employer organizations interested in the advancement of youth welfare, according to Secretary Archie J. Mooney of the California Committee on Apprentice Training.

"The bill incorporates in the State labor laws the principles of the Apprentice Training Plan," Mooney said. "The plan is well underway in San Francisco and other portions of California."

### Apprenticeship Council

The bill provides that the Director of Industrial Relations shall appoint an Apprenticeship Council composed of three representatives each from employer and employee organizations, respectively, and of two representatives of the general public. Also, the State official who has been designated by the State Board of Education as being in charge of trade and industrial education shall be a member of the council, ex-officio.

The Apprenticeship Council shall meet at the call of the Director of Industrial Relations and shall aid him in formulating policies. It shall meet quarterly to establish labor standards for apprentices.

Under the terms of the bill, an Administrator of Apprentices is to be appointed who will act as secretary of the council, and follow out the orders of the council.

Other portions of the bill are:

### Training Provisions

"All training provisions shall conform to the requirements of the Federal and State vocational education acts and the California Plan for Vocational Education.

"A local joint apprenticeship committee shall be selected by the employer and employee organizations, in any trade or group of trades in a city or trade area, whenever the apprentice training needs of such groups justify such establishment. Such committees shall be composed of an equal number of employer and employee representatives, and one representative selected by the local board of education and subject to the approval of the Apprenticeship Council.

"When four or more local joint apprenticeship committees have been established in the State for

## A.S.M.E. to Elect Officers by Letter Vote in September

Election of officers for the American Society of Mechanical Engineers, to serve during 1938, will be held by letter ballot of the membership, closing September 28, it was announced this week.

Nominees, as presented by the regular nominating committee of the society during the recent semi-annual meeting at Detroit, are:

President: H. N. Davis, President, Stevens Institute of Technology, Hoboken, N. J.

Vice-president to serve one year: F. O. Hoagland, master mechanic, Pratt & Whitney division, Niles-Bement-Pond Co., Hartford, Conn.

Vice-presidents to serve two years: W. H. McBryde, consulting engineer, 1111 Financial Center building, San Francisco;

Dean at Louisville

B. M. Brigman, Dean, Speed Scientific School, University of Louisville, Louisville, Ky.;

Harte Cooke, mechanical engineer, McIntosh & Seymour Corp., Auburn, N. Y.;

L. W. Wallace, director of equipment research, Association of American Railroads, Chicago, Ill.;

Managers to serve three years: Carl Bausch, vice-president, Bausch & Lomb Optical Co., Rochester, New York;

S. B. Earle, dean of the School of Engineering, Clemson A. & M. College, South Carolina;

F. H. Prouty, partner, Prouty Bros. Engineering Co., Denver.

a trade or group of trades, or at the request of any trade or group of trades, there may be organized a State Joint Apprenticeship Committee for such trade or group of trades, composed of an equal number of employer and employee organizations."

### Committee Functions

The functions of this committee are to coordinate activities of local committees; specify graduated scales of wages for various localities; specify the appropriate current ratio of apprentices to journeymen, and make recommendations for the general welfare of the movement.

An apprentice is defined as a person not less than 16 years of age entering into a written agreement with an employer or association of employees which provides for not less than 2,000 hours of reasonably continuous employment in a manner approved by the act.

The act outlines the form for apprentice agreements, and provides for the manner of indenture.

The final section of the act reads:

"The sum of twenty-five thousand dollars, or so much thereof as may be necessary, is hereby appropriated out of any moneys in the State treasury not otherwise appropriated to carry out the provisions of this act during the 89th and 90th fiscal years."

## PRODUCTION OF LUMBER GAINS IN CALIFORNIA

Forest Service Survey Shows  
21.2 Per Cent Increase  
Over '35 Total

Lumber production in California for 1936 continued its rise from the low of 1932 with a gain of 21.2 per cent over 1935, according to a preliminary summary of data compiled for the Census Bureau by the U. S. Forest Service.

According to a statement by L. M. Bean of the California Forest and Range Experiment Station and special agent of the Census Bureau the total cut for the State last year was 1,189,849,000 board feet in the pine region and 453,676,000 in the redwood region, for mills with a total cut of 50,000 board feet or over. Small mills producing less than this amount cut 834,000 board feet bringing the total lumber cut in California for 1936 to 1,644,359,000 board feet.

This is only 75 per cent of the peak production in 1936, but was 241 per cent of the low in 1932. Percentages of increase were almost equally divided between the redwood and the pine regions, the former gaining 22.4 per cent and the latter 20.7 per cent over 1935.

### Pine Region Leads

The pine region continues to produce nearly three quarters of California's lumber with ponderosa pine the principal species forming 46.1 per cent of the total cut. Redwood forms 24.5 per cent of the State's lumber cut and sugar pine 13.6 per cent.

Late returns may change final summary figures in the published report of the Bureau of the Census. Returns from 95 per cent of California operators give the cut for the large mills as follows:

	FBM
Lodgepole pine .....	129,000
Ponderosa pine .....	765,950,000
Sugar pine .....	224,290,000
White fir .....	76,111,000
Douglas fir .....	147,779,000
Incess cedar .....	32,597,000
Redwood .....	402,711,000
Spruce pine .....	2,454,000
Oak .....	2,900
Other species .....	502,000

## WORKS DIRECTOR IS BACK AFTER ILLNESS

Director William H. Worden of the San Francisco Department of Public Works yesterday returned to his desk following an absence of several weeks during which he underwent a major operation in a local hospital. Deputy Director S. J. Hester assumed the position of acting director while Mr. Worden was away.

New orders for steel boilers taken during the first three months of 1937 total 2,782, a substantial increase over the total of 1,933 for the same period in 1936, the Bureau of Census reports.

## REA Administrator Opposes Charges for Modernizing Old Style Telephone Lines

Rural Electrification Projects should not be saddled with the cost of modernizing out-of-date rural telephone lines where the construction of new electric distribution systems may produce inductive interference in telephone circuits, Administrator John M. Carmody of Rural Electrification declared yesterday.

Outlining the administration's stand, an REA bulletin declared:

"Claims of operators of old-fashioned telephone systems against R. E. A. borrowers recently have increased markedly. In a number of states these claims for compensation to cover the cost of modernizing the telephone systems have attained proportions which threaten the feasibility of rural electrification projects, Mr. Carmody said. If the claims are met, some projects may have to be abandoned, and the farmers will be left without electric service. In one case in Wisconsin an independent telephone company claimed \$6,008 from a project as compensation for expenses incurred in modernizing its system to eliminate inductive interference. This claim was, of course, disallowed.

### Physical Changes

"These claims for metallizing telephone circuits are entirely separate from claims for physical changes made necessary in the telephone lines—moving poles, relocating lines, cross-overs, and so on. Such claims may, of course, be entirely proper. In the Wisconsin case in which the \$6,008 claim for inductive interference was turned down, a claim of \$267.00 for physical changes was approved by REA.

"Other states in which the problem is most acute include Iowa, where REA has deemed it necessary to disapprove a number of proposed contracts, Oklahoma and Texas. It is understood that the same problem is arising in a number of other states, particularly in the central and western parts of the country. Some states, notably Wisconsin, have declared that a telephone company is not entitled to compensation unless it is experiencing inductive interference in spite of having a modern up-to-date system. A one-wire system with a ground return is not regarded as up-to-date even in cases where such systems are maintained in good physical condition.

"We cannot recognize the feeling which some telephone companies seem to have that their prior occupancy of a public highway entitles them to collect the cost of modernizing old-fashioned, 1-wire telephone systems from later occupants of the same public highway", Mr. Carmody declared in letters to state officials and REA borrowers affected by this question.

### Methods for Correction

"If inductive interference in the form of a hum is experienced in a one-wire system which uses the ground as a return, it can be corrected by installing a second wire and the necessary repeaters, and consolidating for the distance where parallelers occur. Frequently,

out-of-date, one-wire systems are in such a poor state of repair that installing a second wire is likely to involve renewing the poles and the first wire. In the past, attempts have been made to charge REA borrowers for a whole new telephone line. Lately, however, the claim has most usually been confined, as in the Wisconsin incident, to the cost of materials necessary to install a metallic return circuit.

"We would not be living up to our responsibilities under the Rural Electrification Act if we permitted projects to shoulder burdens which we do not think they should properly be asked to bear and which if accepted might easily jeopardize the project's ability to repay the Government loan or, alternatively, force us to refuse to make a loan in the first place", Mr. Carmody said. He added that this view is supported by the trend of court decisions and commission rulings over the country."

## Highway Travel Gains Reported

The average American motorist today drives nearly twice as far every year as he did a decade and a half ago, reports the California State Automobile Association in a statement reviewing results of a nationwide survey.

"This finding," the statement said, "is based upon reports indicating that the average automobile today uses 671 gallons of gasoline each year as compared with 394 gallons a year in 1925.

"Fourteen years ago the average motorist spent about \$87 a year on gasoline for his car, whereas today the average expenditure is approximately \$130 per year for gasoline.

"The increase in cost of gasoline per year is accounted for not only by more gallonage, but also by the constantly mounting rate of taxation on gasoline. In 1925, the average motorist paid only \$4.37 in gasoline taxes. By 1929 the average gasoline tax per vehicle had risen to \$17.71, and today it is more than twice the 1929 level, averaging \$35.90 per year.

"It appears certain that the average annual mileage traveled is increasing even more rapidly than gasoline consumption figures indicate for there is a higher percentage of light cars on the road today than at any time in the past seven years."

## BUREAU AWARDS CONTRACTS FOR WORK ON CANAL

### New River Siphon, Three Highway Bridges, Canal Turnouts Let By Ickes

Secretary of the Interior Harold L. Ickes last week announced the award of two contracts for the construction of the New River Siphon, three highway bridges and two canal turnouts near Calexico, Calif., on the All-American Canal.

The first contract, for construction of the inlet and outlet works of the siphon and the smaller structures, was awarded to Sharp & Fellows Contracting Company of Los Angeles, on its bid of \$269,721.20. The second contract, covering fabrication and installation of the steel plate barrel of the siphon which will be 15 feet, six inches in diameter and 508 feet long, was awarded to the Southwest Welding & Manufacturing Company of Alhambra, California, on its offer to fabricate, transport and install the giant pipe for \$110,775.95.

### Lowest Bids

The successful bids were the lowest in each instance of fourteen proposals received and opened by the Bureau of Reclamation May 7, at its Yuma, Arizona, office.

The New River Siphon will carry the All-American Canal across the gorge of New River, slashed in the floor of the Imperial Valley in 1905-1906 when the Colorado River broke its banks during a flood and all but destroyed the below-sea-level valley. It is one of the principal structures along the All-American Canal, America's biggest irrigation ditch.

The contracts require the successful bidders to begin work in thirty days after receiving notice to proceed and to complete the job in 600 calendar days thereafter.

## BROILER, GRID IN SINGLE ATTACHMENT

The multi-purpose cooking unit announced recently by Westinghouse for use with its rectangular roaster, enables the roaster to do a complete cooking operation including a cycle of roasting, baking, broiling, stewing, toasting, grilling and frying, according to a bulletin of the firm.

The Broiler Grid consists of an adjustable rack with a 1,620-watt heating element designed to provide uniform heat over the entire cooking surface and a reflector with grille top made of an aluminum alloy. The cooking surface is greater in area than the standard size skillet so that larger batches of food may be prepared, or larger single portions, at the will of the cook.

Galvanized range boiler production in April totaled 80,333 units, the Bureau of the Census reports, as compared with 65,773 units in the corresponding month last year.

## LET \$2,283,000 S. F.-OAKLAND BAY SPAN RAILWAY TERMINAL CONTRACTS

Contracts aggregating \$2,283,377 for construction of the San Francisco terminal for interurban electric trains to operate across the San Francisco-Oakland Bay Bridge were awarded yesterday by Director Earl Lee Kelly of the State Department of Public Works.

The awards leave only one major section of the bridge railway facilities—the San Francisco viaduct—to be contracted.

### Lowest Bidders

Awarded in every instance to the low bidder, the contracts were let as follows:

General construction: MacDonald & Kahn Co., Ltd., San Francisco, \$1,658,510.

Structural steel: Columbia Steel Co., San Francisco, \$442,360.

Mechanical work: Scott Co., San Francisco, \$109,257.

Electrical work: Radelfinger Bros., San Francisco, \$73,250.

As awarded, the contracts provide for construction of extensive garages in the building.

Most expensive single unit of the bridge railway system, the terminal will require some 4,000,000 pounds of structural steel and will house an intricate system of ramps and stairways by means of which passengers will have access to and from trains entering the station on elevated tracks.

Tracks and loading platforms will be entirely roofed over a length of 700 feet with large skylights and windows providing ample lighting. Trains will come in to the terminal over six tracks which will be arranged in pairs with platforms between alternate trains.

### Four Entrances

The main station width will be 164 feet. A fence will be placed between adjacent tracks in order to prevent hazards to passengers from incoming and outgoing trains.

The terminal will contain a large waiting room in the center of the station on the ground floor with access to four streets — Mission, Fremont, First and Natoma. Passengers leaving the bridge trains which come in on the elevated train level above the mezzanine floor need not pass through this waiting room but may leave the concourse by means of outdoor or indoor ramps to be located in front of the head house and at each end of the station.

## Fill for Eastbay Yard is Half Completed

Construction on two fronts is being rapidly pushed for the San Francisco - Oakland Bay Bridge electric railway facilities, according to a progress report submitted by Chief Engineer C. H. Purcell yesterday to the State Director of Public Works Earl Lee Kelly.

Fifty per cent of the 250,000 tons of fill material has been placed at the Key Route Mole for storage yards and bridge trains. Concrete for the foundations of twenty piers of the Port of Oakland Overhead has been poured and piling for twenty catenary bridges has been driven to a depth of 126 feet.

Meanwhile, the Santa Fe Railroad Company and the Southern Pacific Company are moving their interchange yard to clear the site for the construction of the overhead Y structure at Twenty-sixth street. "Construction at this point will start in the near future," Mr. Purcell said.

### Speed Demolition

In San Francisco, demolition under Contract R-1A is progressing at a rapid rate with the terminal area west of First street, and the area between Fremont and First streets is expected to be ready for the superstructure contractor by the end of July.

The next contract to be advertised will be for construction of the San Francisco viaduct. Bids will be asked next month, and will be opened in August.

Fabrication of steel work for the structures in the East Bay has continued at plants of the American Bridge Company and Judson Pacific Company.

## S. F. BUILDING PERMIT VOLUME STEADY IN JUNE

### Residential, Alteration Permits Decline; Bureau Fees Increase

San Francisco's building permit total for June amounted to \$2,195,120, an increase of almost \$1,000,000 over the June, 1936, figure of \$1,279,602, Chief Clerk S. J. Rosenblum of the Central Permit Bureau announced yesterday.

Coincident with the release of June permit figures Rosenblum said that fees for building permits issued during the month amounted to \$90,661, an increase of about 40 per cent over the fees for last June. "This amount was the largest to be received by the Central Permit Bureau since June, 1929," he declared.

A drop in residential building was indicated this month with 156 permits issued for frame buildings estimated to cost \$745,970. Frame construction passed the million dollar mark in three previous months this year. The \$745,970 figure exceeded the frame totals for January and February, it was noted.

### Fair Pavilions

Largest single permit of the month was issued for the construction of four pavilion buildings, costing \$214,800, on Exposition Island. The buildings will enclose the central court on the World's Fair grounds.

Following is a classification of permit figures for May, 1937, and May, 1936:

Class.	June, 1937	June, 1936
No.	Est Cost	No. Est. Cost
A	1 \$ 200,000	..... \$
B	3 181,975	1 1,000
C	7 149,926	8 115,750
Frames	156 745,970	173 803,561
Alter.	512 460,029	450 329,920
Public	1 11,000	4 17,465
U.S. Govt.	1 131,420	1 11,906
Harbor	1 100,000	.....
1939 Exp.	1 214,800	.....
Total	683 \$2,195,120	637 \$1,279,602

Production of galvanized range boilers totaled 438,071 during the first five months this year, the census bureau reports, as compared with 321,419 during the corresponding period in 1936.

**BID OPENING POSTPONED**

**SEATTLE, Wash.**—Until July 22, 10 a.m. (date postponed from July 1), bids will be received by J. D. Ross, City Light Bldg., 3rd and Madison Sts., Seattle, for the construction of a concrete arch dam 215 feet high in Ruby Canyon, Step No. 1 of three steps which will ultimately carry the dam to a height of 650 feet above bedrock.

Estimated cost, \$4,500,000. Step One involves construction of an arch dam in Ruby Canyon having elevation of 1150 feet from foundation or 1300 feet from sea level.

Work includes: diversion of river including tunnel through rock of canyon with erection of downstream and upstream cofferdam; stripping sites for rock; construction of dam to sea level elevation of 1300 feet.

Principal items include:

- (1) 200,000 c.y. rock and common excavation;
  - (2) 20,000 feet drilling of grout and drainage holes in foundation;
  - (3) 300,000 c.y. concrete;
  - (4) 22,000 ft. grout and drainage pipe with appurtenances;
  - (5) 300 tons structural steel.
- City will furnish cement. Test pit data to be furnished by City from Rolland's Bar, about four miles upstream from dam site where there is an ample deposit of suitable material. Contractor to furnish sand and gravel.

Steps Two and Three will follow completion of Step One. Step Two involves raising dam to elevation of 1500 feet above sea level. Step 3 consists of raising dam to ultimate elevation of 1725 feet above sea level.

The project will be financed in part with a PWA grant.

Plans and specifications obtainable from Engraving Division, Seattle City Light Dept., 216 City Light Bldg., Seattle, upon deposit of \$25.00.

## BID \$793,000 FOR ROOFING, LINING WORK

### 7 Proposals for Sunset Con- tract Submitted to Utilities Commission

MacDonald & Kahn Co., Ltd., 200 Financial Center Bldg., San Francisco, yesterday submitted a low bid of \$793,397 to the San Francisco Public Utilities Commission for construction of concrete lining, roof and control works at the new Sunset reservoir.

The second large San Francisco project for which the firm has submitted low bid during the past three weeks, the reservoir job is the final major contract in the utilities commission's current program of enlargement of water supply facilities.

MacDonald and Kahn Co. last month was awarded the \$1,658,510 general contract for construction of the San Francisco terminal for the bay bridge interurban railway.

#### Total Bids

Total bids for the reservoir lining and roofing were as follows:  
MacDonald & Kahn.....\$793,397  
Chas. L. Harney.....793,221  
R. G. Clifford.....801,559  
Eaton & Smith.....809,193  
Clinton Const. Co.....111,684  
Barrett & Hill.....824,640  
Gay F. Atkinson.....868,681  
K. E. Parker.....960,604

The difference between the bids of MacDonald & Kahn and Harney, observers pointed out, was accounted for in the last item, for sealing 43,500 feet of construction joints. On this item MacDonald & Kahn bid six cents, while Harney's figure was 23 cents.

## HEATING BOILERS STANDARD ISSUED

The Division of Simplified Practice of the National Bureau of Standards has announced that printed copies of Simplified Practice Recommendation R 157 - 37, Steel Horizontal Firebox Heating Boilers, are now available. Copies may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for five cents each.

## BAR REQUESTS FOR PWA FUNDS

Under terms of the act continuing existence of the Federal Public Works Administration for an additional two years, further applications for funds were barred last week, according to press advices from Washington.

As the 1937 fiscal year came to a close, PWA had on hand some 4271 applications on the approved list. Of these it will be able to provide financial assistance to less than half. PWA officials were quoted as saying that projects costing about \$204,000,000 probably would be finally approved. Eligible projects include reconstruction or replacement of 1172 "hazardous" schools.

## 11 Western States Act to Participate In 1939 Exposition

Cohosts with California in entertaining visitors to the 1939 Golden Gate International Exposition, the ten other states of the West today had taken steps to participate actively in the World's Fair of the West.

Arizona, with an appropriation of \$15,000, is the latest state to arrange for an exhibit on Treasure Island, Bay site of the Exposition.

Other states of the West to make appropriations are: California, \$5,000,000; Nevada, \$25,000; Utah, \$25,000, and Oregon, \$60,000.

Washington and Idaho have earmarked sums from state advertising funds for participation.

Colorado, Montana, New Mexico and Wyoming have appointed Exposition commissions with power to investigate and recommend.

In the Midwest, Illinois and Missouri have each passed appropriation bills of \$100,000.

Additional states providing Exposition commissions are: Arkansas, Florida, Iowa, North Carolina, Wisconsin and Michigan. In Texas, the state planning board will act as an Exposition commission.

## BIDS JULY 28 ON FOUR STATE HIGHWAY JOBS

### Two Bridges, Oil Treatment Project, Seal Coat Job Up for Proposals

SACRAMENTO, July 6.—State Highway Engineer C. H. Purcell today issued four calls for bids, all to be opened July 28, for construction of two bridges, 1.2 miles grading and penetration oil treatment, and applying seal coat to about 18 miles of highway.

Largest contract is for construction of a concrete slab bridge across the Scott River about one mile southwest of Fort Jones in Siskiyou County.

The bridge will consist of four 30-ft. 6-in. spans and two 23-ft. spans on concrete pile bents. Also included in the contract is approach work entailing grading and surfacing of about four-tenths of a mile of roadway.

#### Kern County Bridge

The other bridge will be constructed across Poso Creek about 12 miles north of Bakersfield in Kern County. It will be a reinforced concrete slab bridge consisting of two 32-ft. 6-in. spans and two 24-ft. 6-in. spans on concrete pile bents. Approach work includes grading about two-tenths of a mile of roadway.

The third job involves applying seal coat to about 18 miles of highway between Douie and the Nevada State line in Lassen and Sierra Counties. The contract calls for 355 tons of liquid asphalt, type 90-95; and 4,200 tons screenings.

Grading and applying penetration oil treatment to about 1.2 miles of highway between southern boundary and Point Arena in Mendocino County are involved in the fourth job for which bids were called.

Shipments of galvanized tanks for hot water heaters during the first five months of 1937 totaled 121,757, as compared with 64,011 during the corresponding period last year, according to the census bureau.

 The fleet moorings are to be re-  
 enforced concrete platforms consist-  
 ing of retaining walls, beams, bottom  
 slabs, manholes and mooring fit-  
 tings. Each platform, Type D, will  
 be supported by a precast reinforced  
 concrete fender on wood piles. The  
 work also includes dredging and ex-  
 cavation for the installation of the  
 fenders, filling the bells of the fen-  
 ders with concrete filling, and the re-  
 mainder of the fenders and platforms  
 with sand or other suitable material;  
 provision of macadam surfacing, fen-  
 der system, and manhole fittings.

Alternate bids will be received for  
 the Type "B" platforms supported  
 by composite precast reinforced con-  
 crete and wood piles with sand or  
 sand and coral fill blanket placed  
 on areas on which composite piles  
 for four of the manholes are to be  
 driven. (A fender for the purposes  
 of these specifications is a shell  
 composed of a bottom section called  
 a "bell" consisting of a hollow  
 fender and a hollow truncated cone,  
 and a top section called a "shaft",  
 consisting of a hollow truncated  
 cone and a diaphragm at the junc-  
 tion of the top and bottom sections.)  
 Work involves:

## STATE TO OPEN BIDS AUGUST 4-5 ON 7 HIGHWAY, BRIDGE PROJECTS

SACRAMENTO, July 13.—Seven state highway contracts were authorized for advertising today by the State Highway Commission. Bids on three of the projects will be opened in Sacramento August 4, and on the remaining four in Los Angeles August 5.

Contracts for which bids will be opened here August 4 are:

**Monterey county:** construction of a steel and concrete bridge across Mud Creek about 25 miles north of San Simeon. The bridge will consist of one 80-foot plate girder span and two 41-foot steel beam spans.

**Solano county:** grading, paving with Portland cement concrete and plant-mixed surfacing on about .8 of a mile extending from the Carquinez bridge northward.

**Kern county:** surfacing with plant-mixed surfacing and constructing borders on about two miles near Greenfield.

The following day, August 5, bids will be opened in the office of the State Highway Engineer in Los Angeles on these contracts:

**Imperial county:** grading and surfacing with plant-mixed surfacing about 9.4 miles between Holtville and Brawley.

**Los Angeles county:** widening shoulders and surfacing with plant-mixed surfacing on about 6.6 miles between West Covina and Pomona.

**Ventura county:** constructing a reinforced concrete girder bridge across Big Sycamore Creek, about ten miles south of Oxnard. The bridge is to consist of one 59-ft. span on concrete abutments.

**San Bernardino and Riverside counties:** applying roadmix surface treatment to about 16.9 miles at various locations.

## TO APPOINT TAFT FIRE MAIN GROUP

The city council of Taft has authorized Mayer E. C. Emmons to appoint a committee to study and report on proposed new water mains to be installed for fire protection. A bond issue for this purpose was defeated recently. L. D. Batehelder is chairman of the committee.

## FUNDS FOR S. F. PRESIDIO JOBS WIN APPROVAL

**\$550,000 Barracks Projects Authorized; Hawaii, Canal Zone Work Approved**

Funds for construction of three projects in the Presidio of San Francisco, costing \$555,000 in the aggregate, are included in a \$22,993,088 appropriation for U. S. Army construction recently approved by Congress, it was announced this week.

The three local projects are: barracks for 250 men, \$275,000; barracks for quartermaster and detachments, \$275,000; and telephone construction, \$5,000.

The bill authorizes the establishment of an extension to the air corps technical school in Denver, Colorado, and the acceptance of 960 acres of land within the city limits on which to construct the school. The appropriation includes \$1,735,000 for construction of the first units of the extension.

The funds will be allocated as follows: barracks, \$955,000; hospital headquarters and administration building, \$200,000; runways \$300,000, and grading and improving land, \$300,000.

Funds were approved as follows for new construction at Schofield Barracks, T. H.: barracks for 11th Field Artillery, \$1,526,200; barracks for detachments, \$488,200; telephone construction, \$11,000, and barracks for detachments, \$283,800.

Fort Shafter, T. H., will receive \$825,000 for barracks and \$2,500 for telephone construction. To the Department Headquarters at Fort Shafter goes \$246,500 for new quarters.

The bill includes \$176,000 for barracks for medical detachment at Tripler General Hospital, T. H., and \$5,000 for telephone construction.

Also approved was an allocation of \$3,007,800 for construction at Fort Clayton, Corozal General Depot, Fort Davis, Fort de Lesseps and Fort Kobbe, all in the Panama Canal Zone.

## MacDONALD-KAHN LOW BIDDERS ON AIR DEPOT WORK

**S. F. Firm Submits \$146,641  
Proposal for Equipment  
Repair Building, Offices**

SACRAMENTO, July 13.—MacDonald & Kahn Co., Ltd., 200 Financial Center building, San Francisco, today submitted the lowest of four bids to the office of the Constructing Quartermaster here for construction of the equipment repair building, Air Corps Operations office building and Air Corps engineering office building at the \$7,000,000 Sacramento Army air depot.

Amount of the basic low bid was \$146,641.

Total bids for constructing the three buildings were:

MacDonald & Kahn.....	\$146,641
Eaton & Smith, S. F.....	150,000
Azevedo Const. Co., Sacramento.....	150,500
K. E. Parker Co., S. F.....	151,800

**Reinforced Concrete**  
The equipment repair building will be a two-story reinforced concrete structure, and will measure 200 by 60 feet.

The operations office building and the engineering office building will be annexes to the engineering shop. They will be two stories in height, of reinforced concrete construction. Each will cover an area of approximately 40 by 87 feet.

The bidding schedule contained several proposals providing for additions or deductions to the basic bids, and a list of unit prices.

Parking space for 12,000 automobiles will be available at the 1939 Golden Gate International Exposition.
